

Block CON 5

Overview

Summary of Block CON 5

The onshore Lower Congo Basin is located in the northwest corner of Angola. Block CON 5 is located on the southwest part of this onshore basin and has an area of 683.29 Km². It borders Block CON 3 to the north on latitude 6° 13' 18'', Block CON 4 to the west on longitude 12° 54' 12'', Block CON 7 to the south on latitude 6° 26' 39'' and basement outcrop to the east. B

There had been no hydrocarbon exploration activity within Block CON 5 until seismic data was acquired in 2010.

The principal tectonic events recognised within these two blocks are the Cretaceous syn-rift and post-rift phases followed by the development of a gentle westward dipping margin during the Tertiary.
